SUMMARY

Highly skilled and innovative full-stack developer with a passion for creating visually stunning and intuitive user experiences. Leveraging expertise in HTML, CSS, JavaScript, and modern frameworks like React and Next JS, I strive to craft dynamic web applications that delight users and drive engagement. Seeking a challenging role where I can contribute my technical proficiency and creative flair to collaborate with a dynamic team in delivering cutting-edge digital solutions, pushing the boundaries of web development excellence.

EXPERIENCE

Web Developer | Freelance | Melbourne, Victoria, Australia | January 2023 - Present

- Collaborating with clients to create custom websites tailored to their needs and specifications. Turning design mockups into functional, interactive web pages.
- Utilised a combination of HTML, CSS, JavaScript, and responsive design techniques to develop visually appealing and user-friendly websites across various industries. Ensuring seamless user experiences.
- Upgraded an outdated website to a fully responsive design, ensuring a seamless user experience on various devices.

Mail Officer | Australia Post | Sunshine West PDC, Victoria, Australia | January 2018 - Present

- Demonstrated exceptional problem-solving skills and attention to detail while sorting and processing incoming and outgoing mail, ensuring accurate and timely delivery to designated recipients.
 - Effectively utilized technology, including mail processing equipment and digital systems, to streamline mail handling processes and optimize operational efficiency.
 - Adapting to changes in mail volume, delivery routes, and new procedures.
-

PROJECTS

QKC Studios | <https://www.quietkids.club/>

- Custom apparel brand and social movement for introverts.
- Full functional e-commerce developed and designed with minimalism in mind.
- Built with NextJS, React, Tailwind, and Shopify JS.

N.A.W.A - Not Another Web App! | <https://nawa-weather.vercel.app/>

- Weather app that can generate real-time weather data for any city, uses ChatGPT to generate an weatherman-like summary! Next JS, Tailwind, Tremor, StepZen, OpenAI.
-
